SECTION: Information Board Variables		
Variable Name	Type	Stem & Options
depth_count	integer	Total number of DPTE info-box opens recorded for this participant (count of dppte_data rows with eventtype = 1).
average_time	numeric	Average time (in the same units as campaigntime) a participant spent per opened info box, computed as the mean of (close time - open time) across all opened boxes.
transition_1	integer	Count of 'same candidate, different attribute' transitions between consecutive box opens (within-candidate search).
transition_2	integer	Count of 'different candidate, same attribute' transitions between consecutive box opens (within-attribute / comparative search).
transition_3	integer	Count of 'different candidate, different attribute' transitions between consecutive box opens (unstructured search).
transition_4	integer	Count of 'same candidate, same attribute' transitions between consecutive box opens (repeat views).
comparisons	object	Map of attribute => number of distinct candidates whose box was opened for that attribute, across the whole study's attribute list (0 if the participant never opened a box for that attribute).
total_available_boxes	integer	Total number of distinct info-box pages that were available to the participant across all of their visibility windows (i.e. periods when the campaign info table was on screen).
choices_box_history	object	Map of boxid => list of page numbers (from dppte_times) that were visible to the participant during that visibility window. boxid 901 represents the final, indefinitely-open window if one was never explicitly closed.
